BRA RESEARCH STF3 CENSUS REPORTS AND GLOSSARY

Twenty-nine page profile reports, based on STF3 (Summary Tape File 3, from the sample of about 1 household in 6 that completed the long census form in April 1990), include No.460, City of Boston Profile and Nos 467-482, the 16 Neighborhood Planning Districts Profiles. Similar profiles for the City's 69 Neighborhood Statistical Areas are also available by request.

BRA report No. 430 is a 31 page Detailed Glossary of Census Terminology. A brief description of some key census issues and terms follows.

STF1 (short form, 100 percent count) vs. STF3 (long form, about one in six sample count)

We recommend using the STF1 data over the STF3 data wherever precise STF1 counts are available because of the "confidentiality edit" as well as inaccuracies resulting from the STF3 sampling approach.

To determine differences, the "Total" sample count (STF3) and the "100 percent count" (STF1) are both shown at the upper left on pages 1 and 22 of the 29 page STF3 profiles, from tables P1 and H1, respectively.

CONFIDENTIALITY EDIT, "HOUSEHOLD SWAPPING" AND HOW IT AFFECTS CENSUS DATA.

For the 1990 Census, a new method of protecting the confidentiality was devised. Every cell of every table contains real numbers, but some small fraction of the households reported as being in each place *actually live in some other location*. The households which have been swapped between locations were matched so that the total number of persons by race, American Indian Tribe membership, and Hispanic ethnicity in each location was unchanged by the swapping. Furthermore, age was matched to the extent that the number of persons over and under age 18 in each location was unchanged by the household swapping.

Household swapping does impact upon such data items as exact age, sex ratios, and form of home ownership and household composition as reported in STF1 data tables, and upon items such as education, employment, and income which are covered in STF3 tables. However, *the overall impact of household swapping, called the confidentiality edit, on the accuracy of the data is less than that of non-sampling errors (false or incorrect reporting or recording of data), coverage errors (missed households or persons), and processing errors (clerical and computer errors)*. This new method greatly enhances the utility of the data because all tables are complete including areas of very small population. However, wherever counts are small accuracy is diminished due to the higher rate of household swapping.

No data suppression in 1990. In the 1970 and 1980 censuses, if the number of persons, households, or units to be presented in a table for an area was small enough so that it might have been possible to make individual identifications, then the data in such a table were often suppressed and represented by "****" or 0 in published tables or tape files. While this form of protection of confidentiality was effective, it made it difficult to use the tables as a source for secondary analysis. No exact value could be assigned to "****", and "false" 0's which made it impossible to sum across tables without complex programming to control for suppression of data.

SELECTED SUBJECT DEFINITIONS

Age:

The age classification is based on the age of the person in completed years as of April 1, 1990. Yet, review of detailed 1990 information shows that a number of respondents tended to provide their age as of the date of their completion of the questionnaire, not their age as of April 1, 1990. It is likely that approximately 10 percent of persons in most age groups are actually 1 year younger.

Contract Rent:

Contract rent is the monthly rent agreed to or contracted for, regardless of any furnishings, utilities, fees, meals, or services that may be included. (For more information, see "Specified Renter-Occupied Housing Units Paying Cash Rent".)

Family Households (families):

Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. *Families are classified by type as either a **married-couple family** or **other family** which is further classified into "male householder" (a family with a male householder and no wife present) or "female householder" (a family with a female householder and no husband present).*

Group Quarters:

Includes all persons not living in households. Two general categories of group quarters are recognized:

- 1) institutionalized persons which includes persons under formally authorized, supervised care or custody in institutions (such as correctional institutions, nursing homes, and juvenile institutions) at the time of enumeration and
- 2) other persons in group quarters which includes all persons who live in group quarters other than institutions or persons who live in living quarters when there are 10 or more unrelated persons living in the unit. Also included are persons residing in certain other types of living arrangements regardless of the number of people sharing the unit.

Hispanic Origin:

Persons of Hispanic origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—"Mexican," "Puerto Rican," or "Cuban"—as well as those who indicated that they were of "other Spanish/Hispanic" origin. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. *Hispanic origin is viewed by the U.S. Census as an ethnicity. Persons of Hispanic origin may be of any race.*

Homeowner Vacancy Rate:

The percentage relationship between the number of vacant units for sale and the total homeowner inventory. It is computed by dividing the number of vacant units for sale only by the sum of the owner-occupied units and the number of vacant units that are for sale only. (For more information, see "Vacant Housing Units.")

Householder:

Includes, in most cases, the person or one of the persons in whose name the home is owned, being bought, or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder.

Households:

Includes all the persons who occupy a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Housing Units:

Includes a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. (For more information, see "Vacant Housing Units.")

Non-Family Households:

Includes a householder living alone or with nonrelatives only. (For more information, see "Family Households.")

Race:

The Bureau of the Census collects and publishes racial statistics as outlined in Statistical Policy Directive No.15 issued by the Office of Management and Budget. This directive provides standards on ethnic and racial categories for statistical reporting to be used by all Federal agencies. According to the directive, *the basic racial categories are American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. The directive identifies Hispanic origin as an ethnicity.* The concept of race the Bureau of the Census uses reflects self-identification by respondents that is, the individual's perception of his/her racial identity. The concept is not intended to reflect any biological or anthropological definition. Although the Bureau of the Census adheres to the overall guidelines of Directive No.15, we recognize that *there are persons who do not identify with a specific racial group. The 1990 census race question includes an "Other race" category with provisions for a write-in entry.* Many persons of Hispanic origin self-identified "Other race" as their racial category.

Rental Vacancy Rate:

The percentage relationship of the number of vacant units for rent to the total rental inventory. It is computed by dividing the number of vacant units for rent by the sum of the renter-occupied units and the number of vacant units for rent. (For more information, see "Vacant Housing Units.")

Seasonal, Recreational, or Occasional Use:

Includes vacant units used or intended for use only in certain seasons or for weekend or other occasional use throughout the year. (For more information, see "Vacant Housing Units.")

Specified Owner-Occupied Housing Units:

Includes only one-family houses on less than 10 acres without a business or medical office on the property. The data for "specified" units exclude mobile homes, houses with a business or medical office, houses on 10 or more acres, and housing units in multi-unit buildings. (For more information, see "Value.")

Specified Renter-Occupied Housing Units Paying Cash Rent:

Includes all renter-occupied housing units except one-family houses on 10 or more acres. Housing units that are renter-occupied without payment of cash rent are excluded. (For more information, see "Contract Rent.")

Vacant Housing Units:

A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by persons who have a usual residence elsewhere are also classified as vacant. (For more information, see "Housing Units")

Value:

Value is the respondent's estimate of how much the property (house and lot, mobile home and lot, or condominium unit) would sell for if it were for sale. (For more information, see "Specified Owner-Occupied Housing Units.")

BRA RESEARCH STF3 CENSUS REPORTS AND GLOSSARY

Twenty-nine page profile reports, based on STF3 (Summary Tape File 3, from the sample of about 1 household in 6 that completed the long census form in April 1990), include No.460, City of Boston Profile and Nos 467-482, the 16 Neighborhood Planning Districts Profiles. Similar profiles for the City's 69 Neighborhood Statistical Areas are also available by request.

BRA report No. 430 is a 31 page Detailed Glossary of Census Terminology. A brief description of some key census issues and terms follows.

STF1 (short form, 100 percent count) vs. STF3 (long form, about one in six sample count)

We recommend using the STF1 data over the STF3 data wherever precise STF1 counts are available because of the "confidentiality edit" as well as inaccuracies resulting from the STF3 sampling approach.

To determine differences, the "Total" sample count (STF3) and the "100 percent count" (STF1) are both shown at the upper left on pages 1 and 22 of the 29 page STF3 profiles, from tables P1 and H1, respectively.

CONFIDENTIALITY EDIT, "HOUSEHOLD SWAPPING" AND HOW IT AFFECTS CENSUS DATA.

For the 1990 Census, a new method of protecting the confidentiality was devised. Every cell of every table contains real numbers, but some small fraction of the households reported as being in each place *actually live in some other location*. The households which have been swapped between locations were matched so that the total number of persons by race, American Indian Tribe membership, and Hispanic ethnicity in each location was unchanged by the swapping. Furthermore, age was matched to the extent that the number of persons over and under age 18 in each location was unchanged by the household swapping.

Household swapping does impact upon such data items as exact age, sex ratios, and form of home ownership and household composition as reported in STF1 data tables, and upon items such as education, employment, and income which are covered in STF3 tables. However, *the overall impact of household swapping, called the confidentiality edit, on the accuracy of the data is less than that of non-sampling errors (false or incorrect reporting or recording of data), coverage errors (missed households or persons), and processing errors (clerical and computer errors)*. This new method greatly enhances the utility of the data because all tables are complete including areas of very small population. However, wherever counts are small accuracy is diminished due to the higher rate of household swapping.

No data suppression in 1990. In the 1970 and 1980 censuses, if the number of persons, households, or units to be presented in a table for an area was small enough so that it might have been possible to make individual identifications, then the data in such a table were often suppressed and represented by "****" or 0 in published tables or tape files. While this form of protection of confidentiality was effective, it made it difficult to use the tables as a source for secondary analysis. No exact value could be assigned to "****", and "false" 0's which made it impossible to sum across tables without complex programming to control for suppression of data.

SELECTED SUBJECT DEFINITIONS

Age:
The age classification is based on the age of the person in completed years as of April 1, 1990. Yet, review of detailed 1990 information shows that a number of respondents tended to provide their age as of the date of their completion of the questionnaire, not their age as of April 1, 1990. It is likely that approximately 10 percent of persons in most age groups are actually 1 year younger.

Contract Rent:
Contract rent is the monthly rent agreed to or contracted for, regardless of any furnishings, utilities, fees, meals, or services that may be included. (For more information, see "Specified Renter-Occupied Housing Units Paying Cash Rent".)

Family Households (families):
Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. *Families are classified by type as either a married-couple family or other family which is further classified into "male householder" (a family with a male householder and no wife present) or "female householder" (a family with a female householder and no husband present).*

Group Quarters:
Includes all persons not living in households. Two general categories of group quarters are recognized:

- 1) institutionalized persons which includes persons under formally authorized, supervised care or custody in institutions (such as correctional institutions, nursing homes, and juvenile institutions) at the time of enumeration and
- 2) other persons in group quarters which includes all persons who live in group quarters other than institutions or persons who live in living quarters when there are 10 or more unrelated persons living in the unit. Also included are persons residing in certain other types of living arrangements regardless of the number of people sharing the unit.

Hispanic Origin:

Persons of Hispanic origin are those who classified themselves in one of the specific Hispanic origin categories listed on the questionnaire—"Mexican," "Puerto Rican," or "Cuban"—as well as those who indicated that they were of "other Spanish/Hispanic" origin. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. *Hispanic origin is viewed by the U.S. Census as an ethnicity. Persons of Hispanic origin may be of any race.*

Homeowner Vacancy Rate:

The percentage relationship between the number of vacant units for sale and the total homeowner inventory. It is computed by dividing the number of vacant units for sale only by the sum of the owner-occupied units and the number of vacant units that are for sale only. (For more information, see "Vacant Housing Units.")

Householder:

Includes, in most cases, the person or one of the persons in whose name the home is owned, being bought, or rented and who is listed in column 1 of the census questionnaire. If there is no such person in the household, any adult household member 15 years old and over could be designated as the householder.

Households:

Includes all the persons who occupy a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Housing Units:

Includes a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied (or if vacant, is intended for occupancy) as separate living quarters. (For more information, see "Vacant Housing Units.")

Non-Family Households:

Includes a householder living alone or with nonrelatives only. (For more information, see "Family Households.")

Race:

The Bureau of the Census collects and publishes racial statistics as outlined in Statistical Policy Directive No. 15 issued by the Office of Management and Budget. This directive provides standards on ethnic and racial categories for statistical reporting to be used by all Federal agencies. According to the directive, *the basic racial categories are American Indian or Alaska Native, Asian or Pacific Islander, Black, and White. The directive identifies Hispanic origin as an ethnicity.* The concept of race the Bureau of the Census uses reflects self-identification by respondents that is, the individual's perception of his/her racial identity. The concept is not intended to reflect any biological or anthropological definition. Although the Bureau of the Census adheres to the overall guidelines of Directive No. 15, we recognize that *there are persons who do not identify with a specific racial group. The 1990 census race question includes an "Other race" category with provisions for a write-in entry.* Many persons of Hispanic origin self-identified "Other race" as their racial category.

Rental Vacancy Rate:

The percentage relationship of the number of vacant units for rent to the total rental inventory. It is computed by dividing the number of vacant units for rent by the sum of the renter-occupied units and the number of vacant units for rent. (For more information, see "Vacant Housing Units.")

Seasonal, Recreational, or Occasional Use:

Includes vacant units used or intended for use only in certain seasons or for weekend or other occasional use throughout the year. (For more information, see "Vacant Housing Units.")

Specified Owner-Occupied Housing Units:

Includes only one-family houses on less than 10 acres without a business or medical office on the property. The data for "specified" units exclude mobile homes, houses with a business or medical office, houses on 10 or more acres, and housing units in multi-unit buildings. (For more information, see "Value.")

Specified Renter-Occupied Housing Units Paying Cash Rent:

Includes all renter-occupied housing units except one-family houses on 10 or more acres. Housing units that are renter-occupied without payment of cash rent are excluded. (For more information, see "Contract Rent.")

Vacant Housing Units:

A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by persons who have a usual residence elsewhere are also classified as vacant. (For more information, see "Housing Units")

Value:

Value is the respondent's estimate of how much the property (house and lot, mobile home and lot, or condominium unit) would sell for if it were for sale. (For more information, see "Specified Owner-Occupied Housing Units.")
